

STATEWIDE TRANSPORTATION IMPROVEMENT PROGRAM

Idaho's Transportation Projects for FY 2000, 2001, and 2002

(Projects / programs for fiscal years 2003, 2004, and preliminary development are also included for informational purposes.)

Approved by the Idaho Transportation Board
September 22, 1999

FY2000-2004 STIP CHANGES AS OF March 17, 2000

Projects added to the State Program:

- ◆ Key # 8157, US-12, WB Passing Lane, Dist. 2, FY2002
- ◆ Key # 8156, US-12, WB Passing Lane, Dist. 2, FY2002
- ◆ Key # 8155, US-12, EB Passing Lane, Dist. 2, FY2002
- ◆ Key # 8175, SH-55, Old Horseshoe Bend Hill, Dist. 3, FY2000

Public Lands and Scenic Byway projects that were awarded funding. All other FY 2000 Public Lands and Scenic Byways projects shown in the STIP were not funded.

Public Lands:

- ◆ Key # 5388, Teton Pass Trail, Stg. 2, Dist. 6, FY2000
- ◆ Key # PL61, US-89, WFB to Bishoff Canyon, Stg. 1, Dist. 5, FY2000

Scenic Byway:

- ◆ Key # 8170, Offsys, NW Passage SB Nature Guide, Dist. 2, FY2000
- ◆ Key # 8171, FH 24, Wildlife Canyon Corr. Mgmt. Plan, Dist. 3, FY2000
- ◆ Key # 8172, US-91, Pioneer Historic Byway Brochure, Dist. 5, FY2000
- ◆ Key # 8173, Statewide Scenic Route Brochure Printing, FY2000

STIP Amendment #1, to FHWA, dated March 14, 2000, approval pending:

Additions:

- ◆ Key # 8176, ITD Continuing Const. Ed., Statewide, FY2000

Deletions (per sponsor request):

- ◆ Key # 7194, Int. Northside Blvd. & Karcher Rd., Dist. 3, FY2000
- ◆ Key # 6025, Indian Cr., 17th Ave. N. Bridge, Dist. 3, FY2000
- ◆ Key # 7664, Airport Way to Fox Acre, Dist. 4, FY2000

STIP Amendment #2, to FTA, dated March 13, 2000, approval pending:

Changes by Pocatello Regional Transit:

- ◆ Key # P060, Cost changed from \$251,000 to \$283,000
- ◆ Key # P061, Cost changed from \$27,000 to \$41,000
- ◆ Key # P063, Cost changed from \$563,000 to \$424,000

Changes to the FY2000 STIP that do not require an amendment and are reflected in the ITD Program Supplement 2000-1:

- ◆ Key # 7653, Riggins Pathway, Dist. 2, Delayed from FY2001 to FY2002
- ◆ Key # 7236, ACHD Overlay, Dist. 3, Delayed from FY2000 to FY2001

Changes to the FY2000 STIP made by the Board that will appear in the ITD Program Supplement 2000-2:

- ◆ Key # 6634, SH-21, New York Gulch Bridges, Dist. 3, Delayed from FY2000 to FY2001
- ◆ Key # 7157, SH-55, Lake Fork Canal Bridge, Dist. 3, Delayed from FY2000 to FY2001

As of this date nothing has been approved from the **National Corridor Planning and Development—and—Corridor Border Infrastructure** programs.

*Note 1/3/00 CHS Proj. done - list omitted.
2) Hwy shields on legends on maps did not show.*

Executive Introduction

Statewide Transportation Improvement Program

We are pleased to present the Statewide Transportation Improvement Program (STIP). This program details the utilization of Idaho's federal and state transportation funds.

With Idaho's steady population growth and strong economy, we must strive to meet the challenge of increased demand on our transportation system. The Idaho Transportation Board and the Idaho Transportation Department are committed to a statewide system integrating all transportation modes. The STIP assists in achieving a system that provides for the safe and efficient movement of people and products.

This FY 2000-2004 program outlines our allocation of federal and state money to:

- maintain and improve the state and local highway systems,
- maintain and enhance airports,
- promote bicycle and pedestrian projects,
- implement intelligent transportation system technology,
- improve the efficiency of Idaho's public transportation systems,
- promote safety for all transportation modes.

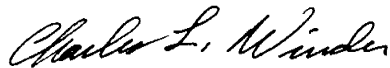

The STIP was developed under guidelines provided by the Transportation Equity Act for the 21st Century (TEA-21), passed by Congress in 1998. The purpose of TEA-21 is to build on initiatives established in the Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA). The new act combines the continuation and improvement of current programs with new initiatives to meet the challenges of improving safety as traffic volumes continue to increase.

The department's working relationships with the state's three metropolitan planning organizations (MPOs) in the Boise, Pocatello, and Idaho Falls urbanized areas ensure consistency between the Metropolitan Transportation Improvement Programs (MTIPs) and the STIP. These ongoing partnerships strengthen the working relationships between the department and the MPOs in their day-to-day planning activities.

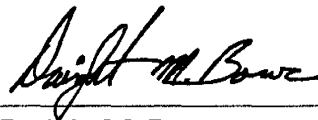

Additionally, the department is developing closer working relationships with multi-jurisdictional planning organizations and various other associations, user groups, organizations, and local entities. This ensures that rural areas and small cities' transportation interests are also represented in the STIP and long-range planning efforts.

The STIP , to the extent of available funding, supports the Idaho transportation system's ability to meet the diverse needs of its businesses and citizens. Transportation investments are important to Idaho's continued economic vitality.

We wish to thank all citizens, elected and appointed officials, and transportation users for their time and effort in providing input for this program. It represents a statewide effort to allocate state and federal transportation funds while maintaining fiscal responsibility.

Charles L. Winder

**HIGHWAY PROGRAM FUNDING PLAN
APPROVED HIGHWAY PROGRAM
FY2000-2004 AND PRELIMINARY DEVELOPMENT**

Accompanying Notes

- 1 FY 2000 CMAQ funds not assigned to programmed projects have been transferred to STP-State. FY 2001-2004 retains \$4 million (Federal-Aid) CMAQ apportionment in CMAQ program with balance transferred to STP-ST pending project selection in CMAQ Program.
 - 2 Transfer of \$4.5 million Local Rural STP funds for \$2.8 million state funded exchange program.
 - 3 Available funding based on ISTEA minimum funding of \$1.132 million for Hazard Elimination plus \$.5 million for guardrail.
 - 4 Available funding based on ISTEA minimum funding of \$.714 million for Rail Crossing and Protective Devices plus available funding based on ISTEA minimum funding of \$.714 million for Rail Crossing Elimination Hazards.
 - 5 Enhancement - Available with match is derived from individual project \$ and respective % applied. Reference HP on Hqissv21\X\Patdata\Current Docs\Enh Projects 99-02.
 - 6 These funds can be used only on ISTEA Demonstration projects.
 - 7 Based on estimated funding levels through end of TEA21.
 - 8 Apportionments estimated by Western Federal Lands Highway Division assumes 90% OA.
 - 9 Contingent upon successful application of funding.
 - 10 Pending Congressional Approval
- * Discounted 5% a year beginning in FY2001 to allow for inflation in future Program Updates.

This page covers scheduled PE, RW, and CI amounts for separately identified projects available upon request. Contract increase amounts are for unforeseen increases to contracts obligated in prior years.

Fiscal Constraint

The table entitled “Available Funding vs. Programmed Projects” that is found in this section compares the annual total costs of projects programmed in each category of funding to the anticipated annual available funding for each category. Following is the methodology for estimating available funds for each transportation mode or program.

Highway Funding Assumptions

The table entitled “Available Funding vs. Programmed Projects” that is found in this section shows the estimated FY 2000 – 2004 apportionments for Idaho. Because actual funding is not known until after the beginning of each fiscal year, funding assumptions are made to allow continued development of projects. Upon notification of the final FY 2000 apportionments the highway program will be adjusted as necessary to maintain fiscal constraint. Following is a comprehensive list of assumptions used to develop the highway funding levels.

Federal-aid Funding Assumptions

Federal-aid apportionments are based on the following assumptions:

- Program structure is based on TEA-21 Funding structure. TEA-21 is active through FY 2003. FY 2004 assumptions are based on estimated apportionment levels in the last year (FY2003) of TEA-21.
- Obligation Authority is equal to the estimated apportionments throughout the life of TEA-21
- The FY 2000-2004 Highway Development Program does not include any year-end redistribution of Obligation Authority not used by other states.
- The FY 2000-2004 Highway Development Program does not include any Revenue Aligned Budget Authority (RABA) due to adjustments in the funding available to the states should the highway revenues exceed the “firewall” established under TEA-21.
- The "Available With Match" amounts includes the match and federal funds estimated to be available to program projects. These amounts are reduced 5% each year (FY 2000 and beyond) to allow for the estimated effects of inflation on project costs.

State Funding Assumptions

State Funded Program:

Changes enacted by the 1999 Legislature under SB 1173aa amended Sections 40-701 and, 49-402, Idaho Code which required the Department to separately report on the State Restricted fund source. Beginning in FY 2000 the State and State Funded Restricted (STR) Programs were combined into one Program called the State Funded (ST) Program.

An amount of \$59.6 million is available for the State-Funded Program in FY 2000. This is an increase over the amount budgeted at the beginning of the state fiscal year. The increase is due to the following factors:

1. A \$ 24.1 million increase to make use of a favorable cash balance and improved revenue forecast for FY 2000.
2. A \$ 4.0 million increase because two previous holdbacks were lifted due to the improved revenue forecast in FY 2000.

Aeronautics Funding Assumptions

Both the federal and state programs are grant programs funded by user taxes. The approval or disapproval of each grant application determines funding. Available funding levels are estimated on appropriation and authorization levels. Federal-aid airport grants are from the Federal Aviation Administration direct to the airport owner (city, county, or state) and do not pass through the Idaho Transportation Department. State funds provide grants for improvements not eligible for federal assistance in addition to assisting with matching funds for federal-aid grants.

Public Transportation Funding Assumptions

The Public Transit Program is a grant program. Historical funding trends are used to estimate the funds available for FY 2000. If a grant is not approved by the Federal Transit Administration, the project will not be funded, thus maintaining fiscal constraint.

The Transportation Equity Act for the 21st Century (TEA-21) is the basic law under which all federal transportation programs are funded. More specifically, Title III, the Federal Transit Act Amendments, is the authority for the funding of several public transportation programs. They are administered by the Federal Transit Administration (FTA) through the Idaho Transportation Department's Division of Public Transportation and consist of the following:

- Demonstration funds are available which are "discretionary" funds generally allocated for specific capital projects approved by Congress.

- The Division of Public Transportation and Idaho's three metropolitan planning organization's receive planning funds known as Section 5303 and 5313 which are allocated by statutory formula. A 20% match is required.
- Urban transit assistance funds known as Section 5307 are allocated to the three metropolitan areas by statutory formula. A 50% match is required for operations, 20% match for capital expenditures, and 10% match for capital expenses related directly to the compliance with the American's with Disabilities Act.
- Capital and purchase of service funds known as Section 5310 are distributed for assistance to the "elderly and disabled." A 20% match is required.
- Rural transportation funds known as Section 5311 are allocated for small city/rural public transportation service providers. A 50% match is required for operations and a 20% match is required for administrative and capital expenditures.
- Rural Transportation Assistance Program funds are allocated for technical assistance and training in rural areas.
- Congestion Mitigation and Air Quality (CMAQ) funds can be spent on public transportation projects at the discretion of the Idaho Transportation Board. If spent, these funds are administered through FTA.

State Rail Funding Assumptions

Federal funding for the Local Rail Freight Assistance (LRFA) program, or any similar program enacted into law (the LRFA program has not been funded since 1995), is provided by the Federal Railroad Administration (FRA) as a national grant program. Available funding is estimated using recent historical trends. The railroad, shippers, or other private/local sources provide the required local match. If the current update to the *State Rail Plan* identifies a qualified project or projects, and the railroad agrees to the terms of the project, an application will be made to the FRA. Projects on this program are contingent upon the amount of grant funds made available. Only the projects or portions of projects approved for a grant will be funded, thus maintaining fiscal constraint.

Aeronautics Program

Aeronautics Program

For more information contact:
Wayne D. Pickerill, PE/LS
Airport Planning and Development Engineer
Division of Aeronautics
Phone: (208) 334-8783
FAX: (208) 334-8789

Description of the Mode

In a largely rural state such as Idaho, air travel is often an attractive alternative for business, commercial, emergency, recreational, and private travel. The Division of Aeronautics provides aid to all 71 city and county airports and maintains 30 state-operated recreational and emergency airstrips.

Determination of Needs

The Division of Aeronautics coordinates a multi-level planning process with the Federal Aviation Administration (FAA) and municipalities comprised of the State Aviation System Plans, Airport Master Plans, and the Capital Improvement Programs. System planning establishes statewide needs while master planning is a more detailed plan for a single airport.

Funding

Airport projects are funded from a combination of federal, state, and local sources. Federal funds are basically available to Idaho airports in two categories, generally by airport function:

- Primary-service airports have regularly scheduled air service and enplane over 10,000 passengers annually (7 sites).
- General-aviation airports provide service for small aircraft (34 sites).

FAA grants are generally for 90 percent, the municipality provides the remaining 10 percent. These grants are made from the FAA directly to the municipality and do not pass through the Idaho Transportation Department as in other programs. State grants can be used to assist with matching the federal grants and for improvements not eligible for federal assistance.

Both federal and state programs are funded by user taxes. At the federal level, airline ticket tax, airfreight waybill tax, international passenger departure tax, and aviation fuel tax are income sources. The state airport program is funded by aircraft fuel tax and aircraft registration tax.

Project Selection

Project selection is a collaborative process involving the FAA, municipalities, and the ITD. Statewide systems planning and airport master planning coupled with public input are the basis of the Capital Improvement Program. ITD solicits project applications annually. The grant cycle takes eleven months as outlined below.

MONTH	ACTION ITEMS
NOVEMBER	Letters to Sponsors (copies attached) Requesting: <ul style="list-style-type: none">- Grant Applications- Capital Improvement Programs (CIP)
FEBRUARY	Deadline for Submission of Applications Develop Draft Aeronautics Statewide Transportation Improvement Program (STIP)

RE: APPLICATION FOR STATE AIRPORT IMPROVEMENT AID (FY 2001)

Dear Sir/Madam:

The Idaho Transportation Department, Division of Aeronautics, is soliciting applications for airport improvement aid for FY 2001 (July 1, 2000 – June 30, 2001). Enclosed is a copy of the “Application to Idaho Airport Aid Program” to use in submitting your request (please make photocopies as needed). The application deadline will be February 28, 2000. The Idaho Transportation Board, subsequent to legislative approval of the FY 2001 budget, will review the recommended list of grants at their regular April 2000 meeting.

I also request that you submit, on a separate sheet, a year by year listing of your proposed future projects for fiscal years 2002, 2003, 2004, and 2005 with an estimate of cost for each. Also, please submit this even if you are not applying for an FY 2001 project. Your submittal will be used to develop the Aeronautics portion of the Idaho State Transportation Improvement Program (STIP).

Idaho Transportation Rule IDAPA 39.04.04 (enclosed) calls for each airport receiving financial assistance through this program to have an approved Master Plan or Airport Layout Plan (Section 4.A) and airport height limitation zoning (Section 4.D). Observance of these requirements will be mandatory. The first \$2,000 of these work items can be 100% state-funded with prior approval. Also, our staff will assist you in any way we can, including but not limited to, supplying model ordinances.

Should you have any questions or need help in the formulation of your project or completion of the application form please contact me at (208) 334-8783. As always, I look forward to working with you in our joint effort to improve the air transportation system in Idaho.

Sincerely,

Wayne D. Pickerill, PE
Airport Planning and Development Engineer

Bicycle & Pedestrian Program

Bicycle / Pedestrian Program

For more information contact:
Mark McNeese
Senior Transportation Planner
Division of Transportation Planning
Phone: (208) 334-8272
FAX: (208) 334-4432

Description of the Mode

The Idaho Transportation Department recognizes the value of bicycling and walking and offers opportunities for funding support. The majority of bicycle/pedestrian projects on the State Highway System are implemented in conjunction with designated highway improvement projects. Bicyclists and pedestrians are legitimate users of the state's transportation system and all federal, state, and local providers of transportation facilities should consider and accommodate their needs.

Determination of Needs

The *Idaho Bicycling Guide* was printed in February 1997 and is now available through the Division of Transportation Planning. A statewide *Idaho Bicycle and Pedestrian Transportation Plan* was completed in January of 1995. The plan establishes two strategic goals: (1) to double the percentage of total trips made by walking and bicycling in Idaho, and (2) to simultaneously reduce by ten percent the number of bicyclists and pedestrians killed or injured in traffic accidents. Using this planning document as a guide, the needs of cyclists and pedestrians will be assessed statewide at local levels. Cities, counties, and metropolitan planning organizations must determine where needs exist for improved facilities, notify appropriate local and state officials, and coordinate with ITD's bicycle/pedestrian planning program.

Funding

Funding for bicycle and pedestrian projects is available through ITD from the National Highway System (NHS) and Surface Transportation Program (STP) funding categories. These revenues can be used for both construction and non-construction activities. The Enhancement program recognizes bicycle and pedestrian projects as a special category of funding. However, everyone interested in improving our transportation system to better accommodate bicyclists and pedestrians should consider every highway project as a potential bicycle and pedestrian project as well. All of the various funding programs described in the update packet for the *Highway Development Program* are eligible sources of federal-aid funding for bicycle and pedestrian projects. In addition, funding programs described in the sections titled Public Transportation and Highway Safety Program are also eligible for specific types of bicycle and pedestrian projects.

Project Selection

Project selection is a collaborative process between state and local transportation officials and citizen representatives of system users. The key to selection is for communities to determine a long-term sense of direction, which then becomes part of a comprehensive transportation system plan. Annually, the ITD solicits project proposals to be included in its *Statewide Transportation Improvement Program* (STIP) which is approved by the Transportation Board. Project selection is quite competitive and only projects with demonstrated community support, adequate local planning, and documentation of public input have the potential of being funded.

Application Process

The schedule is concurrent with the schedule in the *Highway Development Program* section, which is determined annually in late November. The department publishes a STIP Planning Calendar that shows the various project submittal deadlines for specific funding categories.

Highway Development Program

Highway Development Program

For more information contact:
David R. Amick
Highway Programming Manager
Division of Highways
Phone: (208) 334-8264
FAX: (208) 334-3858

Description of the Mode

From farm-to-market roads to Interstate highways, Idaho's highways, roads, and streets are vital to the state's economy. The state's agriculture, forestry, commerce, tourism, and recreation industries are dependent on good highways.

Idaho has approximately 60,000 certified public road miles. Of these, the State Highway System (all Interstates, U.S. Routes, and State Highways) contains approximately 5,000 miles. Although the state system comprises only 8 percent of the total miles, it carries 55 percent of the total vehicle miles of travel (VMT). This imbalance of "travel" miles to "highway" miles is due to the fact that the State Highway System serves the principal traffic flows, particularly intercity travel.

Determination of Needs

The determination of needs is a collaborative process in each district among the ITD, federal and local agencies, and the public. Roadway data, public input, agency input, and community / state planning documents are all considered as projects are selected and prioritized. The requested projects are reviewed annually by all participants during the *Statewide Transportation Improvement Program* (STIP) update process.

Funding

A variety of funding sources* are available for highway development, which include:

- Interstate Maintenance (IM)
- National Highway System (NHS)
- Surface Transportation Program (STP) - State Highway
- STP - Local Urban
- STP - Local Rural
- STP - Safety (Hazard, Rail)
- STP – Enhancement (Statewide application process)
- Congestion Mitigation / Air Quality (CMAQ) (Statewide application process)
- Bridge (State, Local, and Off-System)
- Metropolitan Planning
- State Planning and Research
- Demonstration or High Priority Projects (congressionally funded under the last two Highway Acts)
- Scenic Byways Discretionary Funding (Applications are submitted and awarded through FHWA)
- Technology and Research
- Forest Highways
- State Funded
- Public Lands Highways Discretionary (Applications are submitted and awarded through FHWA)
- Borders and Corridors Discretionary (Applications are submitted and awarded through FHWA)
- Indian Reservation Roads (Administered by the Bureau of Indian Affairs)
- Recreational Trails (Administered by the Idaho Department of Parks and Recreation)

* Additional information on the funding sources that can be used to construct projects is found at the end of this section.

The total cost of a scheduled project includes preliminary engineering, right-of-way purchases, and construction. However, most of the preliminary engineering work and right-of-way purchase on future projects must realistically be pursued well in advance of the planned fiscal year of construction. Project costs identified in the STIP include construction costs only unless specifically noted otherwise.

The Highway Development Program is fiscally constrained in each year of the STIP. For information the STIP shows the aggregate of preliminary engineering, contract increases, and right-of-way acquisition that is scheduled annually, in a table in the “Funding Summaries” section.

Project-level detail on preliminary development and right-of-way expenditures can be found in the *Highway Development Program*. The Highway Development Program is provided to FHWA and FTA as an addendum to the STIP and is available upon request.

Project Selection

Project selection is a collaborative process between ITD headquarters, the ITD districts, the metropolitan planning organizations, local transportation officials, and the public. The key to selection is for communities to determine a long-term sense of direction, which then becomes part of a comprehensive transportation system plan.

The Idaho Transportation Board reviews and approves the *Highway Development Program* each September. The *Statewide Transportation Improvement Program* includes five years plus preliminary development (projects yet to be assigned a construction year). The first three years receive official approval from FHWA and FTA, the other years are included for planning purposes.

Public Transportation Program

Public Transportation Program

For more information contact:
Janet Weaver
Senior Transportation Planner
Division of Public Transportation
Phone: (208) 334-8828
FAX: (208) 334-4424

Description of the Mode

Public transportation provides mobility alternatives for Idaho citizens and is a vital resource in sustaining economic development, enhancing the quality of life, relieving congestion, improving air quality, and reducing environmental and transportation concerns throughout the state. Public transportation services include:

- Fixed transit routes;
- Scheduled or unscheduled transit service provided by motor vehicle, bus, van, aerial tramway, and other modes of public conveyance;
- Paratransit service for the elderly and disabled;
- Shuttle commuter service between cities, counties, health-care facilities, employment centers, educational institutions, or park-and-ride lots;
- Subscription van or car pooling services; and
- Transportation services unique to social service programs.

ITD's Division of Public Transportation provides statewide general program coordination, planning, grant project monitoring, and process management. The division works with the Public Transportation Advisory Council, the six Regional Public Transportation Advisory Committees, the Interagency Working Group, and the public to develop policies that will help meet the transportation needs of the citizens of Idaho.

Three metropolitan providers currently operate in urbanized (50,000+ population) areas:

- Boise Urban Stages (BUS) in Boise;
- CART, Inc. (Community and Rural Transportation) in Idaho Falls; and
- Pocatello Regional Transit (PRT) in Pocatello.

Nine city/rural transit systems serve populations less than 50,000:

- North Idaho Community Express (NICE) in Coeur d'Alene;
- Valley Vista Care Corporation in St. Maries;
- Moscow/Latah County Public Transit (M/LPT) in Moscow;
- Regional Public Transportation (RPT) d.b.a. Valley Transit in Lewiston;
- Treasure Valley Transit (TVT) in Nampa;
- Trans IV Buses in Twin Falls;
- Ketchum/Sun Valley Transit Authority (KART); and
- CART and PRT also contain rural elements within their service range.

At least 85 organizations currently provide land-based transportation services in Idaho. Some of the providers (e.g., Greyhound and Northwest Trailways) provide service in multiple regions while others serve a limited area or population. Many senior-citizens organizations and disabled workshops operate vans or small buses for clients and the Idaho Department of Health and Welfare and the Idaho Division of Vocational Rehabilitation provide transportation services either directly or through reimbursements. A major goal of the division is to facilitate coordination and to help eliminate duplication of services

Public transportation in Idaho has improved significantly over the past few years. Service levels have increased and public transportation planning and administration have been strengthened. Over the next 5 years, improvement opportunities include strengthening policies, planning and programming governance, coordination, services, funding, and benefits.

Determination of Needs

In 1995, the Idaho Transportation Board approved and adopted *Movin' Idaho — Idaho Public Transportation Plan*. This qualitative plan was developed by a planning team consisting of Regional Public Transportation Advisory Committees (RPTAC) and the Public Transportation Advisory Council (PTAC) together with providers, staff, and consultants to create a proactive, long-term planning effort.

In 1996, the field research document *Idaho Statewide Public Transportation Needs and Benefits 1996 Telephone Study* was completed. The purpose of the telephone survey study was to measure public opinion on existing public transportation services and assess current and expected needs. The study also polled attitudes toward state and local funding for public transportation.

In 1997, the *Idaho Statewide Public Transportation Needs and Benefits Analysis Study* was completed. The study provides an overview of existing public transportation services. Through the use of mapping, data collection, and research, this document assessed levels of service in each district and identified unmet needs that existed throughout the state. The results will help the Division of Public Transportation to:

- Increase public understanding of current and near-term public transportation needs;
- Provide a mechanism to help identify appropriate levels of service that will result in the highest value per dollar invested into public transportation; and
- Help identify funding issues.

The study is providing the Regional Public Transportation Advisory Committees (RPTAC), the Public Transportation Advisory Council (PTAC), and the division with valuable qualitative and quantitative facts that benefit analysis, planning, and decision-making into the 21st century.

The division will incorporate the information from the needs study into an updated plan called *Movin' Idaho: A New Direction* in the upcoming months. The division will continue to identify and prioritize public transportation needs and provide guidelines for statewide transportation funding through public input and resource identification.

Funding

Presently, the Idaho Transportation Board has approved a three-year pilot program (FFY99-01) using state funds to purchase capital equipment. The Idaho Legislature approved funding for the first year of the Vehicle Investment Program in 1999. Federal funding is available to Idaho under Chapter 53, Title 49 of the United States Code (U.S.C.) and the Transportation Equity Act for the Twenty-First Century (TEA-21). All funding programs available to the Division of Public Transportation are administered by the Federal Transit Administration (FTA). The following programs are funded in Idaho:

Metropolitan Planning — 49 U.S.C. 5303: Funding is allocated to the state and distributed to the Metropolitan Planning Organizations (MPOs) by formula based on population. Currently there are three MPOs in Idaho — Ada Planning Association in Boise, Bonneville Metropolitan Planning Organization in Idaho Falls, and Bannock Planning Organization in Pocatello. A 20% local match is required. Idaho is in the process of piloting a consolidated grant program which combines FTA grant funds with FHWA metropolitan planning organization planning funds. The process will be further evaluated.

Urbanized Area Formula Program — 49 U.S.C. 5307: Funding is allocated by statutory formula to the urbanized areas of the state. This program provides funding for areas with a population of 50,000 or more. Idaho has three urbanized areas — Boise, Idaho Falls, and Pocatello. A 50% local match is required for operations, a 20% match for administration and capital expenditures, and a 10% match for capital expenses related directly to compliance with the Americans with Disabilities Act.

Nonurban Area Formula Program — 49 U.S.C. 5311: Funding is allocated to the state and is distributed to meet the needs identified in small cities (population under 50,000) and rural areas. A 50% local match is required for operations and a 20% match is required for administration and capital expenditures.

Intercity Bus Service — 49 U.S.C. 5311(f): Funding is allocated to the state and each state must use at least 15% of the Section 5311 funds to provide transportation to connect nonurbanized areas with national public transportation services. A 50% local match is required for operations and 20% match for administration and capital expenditures.

Rural Transit Assistance Programs (RTAP) — 49 U.S.C. 5311(h): Funding is allocated to the state for transit research, technical assistance, training, and related support services in nonurbanized areas. No match is required.

Elderly and Persons with Disabilities Program — 49 U.S.C. 5310: Funding is allocated to the state and is distributed based on elderly and disabled populations in the state. The funds may be used for purchase of service funds or capital acquisitions for private nonprofit organizations or public agencies that provide public transportation to the elderly and persons with disabilities. A 20% local match is required.

State Planning and Research — 49 U.S.C. 5313: Funding is allocated to the state and used to perform statewide transit planning. Activities include providing technical assistance to the MPOs, developing the statewide public transportation plan and strategic plan, and assisting the Public Transportation Advisory Council and the six Regional Public Transportation Advisory Committees with long-term planning. A 20% match is required.

Statewide Administration — 49 U.S.C. 5310 and 5311: Funding is reserved from the state allocations by the division to provide program administration and fulfill oversight responsibilities. The state may reserve up to 15% of the 5311 funds and 10% of the 5310 funds. The 5310 funds require a 20% match and there is no match requirement for the 5311 funds.

Congestion Mitigation and Air Quality (CMAQ): CMAQ funds are Federal Highway Administration funds allocated to the state that be used to fund public transportation projects at the discretion of the Idaho Transportation Board. The funds are transferred to the Federal Transit Administration after the Board has approved the project. Transit projects include capital purchases, transit planning, and transit start-up. The local match is 7.34%.

Demonstration funds: Section 5309 “Discretionary” funding is generally allocated by Congress for specific capital projects. States and local public bodies are eligible applicants for these funds. The Division of Public Transportation is working with a group of interested agencies to prepare a statewide grant application for FFY01. Local match requirement ranges from 20% to 40% depending on the project.

Job Access and Reverse Commute Program: This new program was authorized in TEA-21 to provide transportation in partnership with the welfare to work initiatives around the country. Local match requirement is 50% and contract income, and funds from other Federal agencies may be used as match.

Flexible Funds: TEA-21 maintained the flexible funding provisions of the previous highway act that allows Surface Transportation Program (STP) funds to be used for both highway and transit projects. Eligible transit projects include vehicles, facilities and any other capital transit project eligible for assistance under 49 U.S.C. Chapter 53. Funds would be available with a local match range between 7.34 % and 20% depending on the program.

Project Selection

Project selection is based on the needs identified in the *Statewide Public Transportation Needs Assessment and Benefits Analysis Study*. The study included a series of strategies to maintain current service, enhance or expand existing services, or implement new services to meet the unmet need. Strategies were developed for each service (fixed route, demand response, rideshare (carpool and vanpool), intercity, and organized volunteer). The County Profiles identifying the needs in each county are updated each year with public input.

Division staff reviews each grant application to make sure it meets all the application criteria and all federal requirements. The projects are evaluated to identify the organization which can best provide the services described. Staff develops a regional program of recommended projects for the 5310, 5311 and 5311(f) programs and works in concert with each Regional Public Transportation Advisory Committee in reviewing proposed projects. Each committee provides input to the Public Transportation Advisory Council (PTAC) on staff recommendations.

Staff recommends a statewide program of projects to the PTAC. PTAC reviews the projects and provides input to the Idaho Transportation Board on the recommendation. The Transportation Board reviews the complete program of projects for all Federal Transit Administration programs and upon approval the process begins through which the funding is distributed.

Application Process

Applications for the Urbanized Area Formula Program Grants (5307) are prepared and submitted to Federal Transit Administration for the three urban areas in the state. The state has an oversight responsibility for these funds but the urban areas report directly to FTA. Urban monies become available to these providers on October 1st.

The division develops and submits a statewide application each September for all planning activities (5303 and 5313). Funds are available to the state and the MPOs on October 1st.

The division develops and submits an application each March for the Nonurbanized Area Formula Program (5311) and the Elderly and People with Disabilities Program (5310). Funds are made available to the providers on April 1st.

FY 2000 Application Time Line for 5310 and 5311 Grant Programs

July - September 1999	Open grant application period.
October - November 1999	Review and evaluation of grant applications by division staff.
December 1999	Regional Public Transportation Advisory Committee reviews division staff recommendations.
January 2000	Public Transportation Advisory Council reviews division staff recommendations.
February 2000	Idaho Transportation Board review and approval.
March 2000	Application submitted to FTA by division.
April 2000	State/Local agreements begin - Site visits with grantees to review agreements and reporting requirements.

Public Involvement

All applicants for the Nonurbanized Area Formula Program and the Elderly and Persons with Disabilities Program grant funds must notify the public in several ways and ensure they are a part of the process prior to submitting an application for funding to the division.

Applications for project funding whose proposed service area or level of service is significantly different from that previously funded must hold a public hearing on the proposed project. Applicants for project funding whose service area or level is not significantly changed from that previously funded must publish a notice that continued funding is being requested. The applicant must provide notification to private and other operators of public transportation services within the service area in order to avoid duplicating services. Notices must be written to give interested parties a fair and timely opportunity to comment.

The public may also provide comments about the proposed program of projects during the review process by the Regional Public Transportation Advisory Committees and Public Transportation Advisory Council. Public notices are published for each meeting and the public is encouraged to attend and comment on the proposed projects.

State Rail Program

State Rail Program

For more information contact:
Ron Kerr
Senior Transportation Planner
Division of Transportation Planning
Phone: (208) 334-8210
FAX: (208) 334-4432

Description of the Mode

The 1,917 miles of railroad lines in Idaho include main lines, secondary main lines, branch lines, and short lines. The state is served by two major railroads, the Union Pacific and Burlington Northern Santa Fe, providing connections to points in the United States, Canada, and Mexico, as well as six short-line railroads that act as feeders to the major railroads.

The Idaho Transportation Department does not own or operate any active rail lines. The role of the state rail program is to assist in the preservation of essential rail lines through state rail planning and administration of the federal Local Rail Freight Assistance (LRFA) Program or other eligible programs that may become available.

Determination of Needs

The primary focus of state involvement in rail planning and the federal LRFA program has been to assure that Idaho will be served by an efficient rail network integrated into a state transportation system, and to preserve those rail lines which are essential to Idaho's economy and the overall transportation system.

The economics of the rail system and alternative methods for retaining essential rail services are evaluated in the rail planning process. Priority is given to branch lines that could be abandoned or have reduced service because of poor track conditions, resulting in impacts on rail shippers and shifts of rail traffic to trucks, which can negatively impact state and local roads. The rail planning process benefits shippers, railroads, communities and local officials who have a stake in preserving essential local rail freight service and jobs in the community.

Funding

The U.S. Department of Transportation's Federal Railroad Administration (FRA) provides federal funding for the LRFA Program. The railroad, shippers, or other private/local sources provide a minimum 30 percent local match. The funds are used primarily for capital improvements such as track rehabilitation and/or new connections. Identified projects which request financial assistance are reviewed and screened by the Idaho Transportation Department with regards to the needs identified in the rail planning process. Based on this evaluation, projects are selected annually for LRFA Program funding.

Due to limited funding and the discretionary nature of the LRFA Program, the FRA has historically funded only one project per state per year. Future projects beyond a one- or two-year horizon are difficult to anticipate because the state's rail system has been changing as major carriers sell or lease lines to smaller regional carriers, and because of uncertainties about future federal funding. Congress has not appropriated funds for the LRFA Program since fiscal year 1995. Congress authorized the Light Density Line Pilot Program in TEA-21 but no funds were appropriated for FY 1999 or 2000.

Project Selection

The track rehabilitation program is designed to improve those rail lines in the state that have suffered from deferred maintenance, and the infusion of funds could prevent the rail line from being abandoned. Potential projects must have a benefit/cost ratio greater than 1.0 and the line must carry a minimum volume of traffic. Projects are selected by the Idaho Transportation Department in coordination with appropriate local officials, shippers, the Idaho Railroad Advisory Council, and the railroads involved, with final approval made by the Transportation Board. Completion of these projects can take many years. The rail rehabilitation projects listed in the STIP are contingent on funding being available for the LRFA Program or other eligible sources in future years, and inclusion in the eligible Program of Projects in the *Idaho State Rail Plan and Updates/Amendments* thereof.

Application Process

The application process assumes that funding for the Local Rail Freight Assistance (LRFA) Program, or any other eligible program, is authorized and appropriated by the time each federal fiscal year begins. So far, Congress has not reauthorized or funded the LRFA or the Light Density Line Pilot Programs for fiscal year 1999 or 2000. Inquiries are made in September to railroads as to their interest in having the state apply to the Federal Railroad Administration (FRA) for

LRFA funding. Only certain lines carrying a minimum and maximum threshold of rail traffic are eligible. If a railroad is interested, field inspections are undertaken to determine rehabilitation needs. Detailed rehabilitation plans and benefit/cost analyses are developed. If a project or projects qualify, an application is prepared and forwarded to the FRA by January of each year. If the FRA approves the project(s), grant agreements are issued by the FRA in May or June of that year. Following the Idaho Transportation Board's approval, an agreement and technical specifications are negotiated with the railroad and implemented. The State Rail Planner conducts this process because rail rehabilitation needs are addressed and prioritized on a statewide basis through the state rail planning process. Federal funds are limited which normally allows for only one project per year for each state.

Public Involvement/District Information

The Idaho Transportation Department must provide the opportunity for a public hearing when a rail project is proposed. There is no federal requirement for rail projects to be included in the Statewide Transportation Improvement Program (STIP). Since the STIP reflects projects identified within the State Rail Plan and Updates/Amendments, and is intended to be a multi-modal document, any public involvement for the STIP would be in addition to the federal requirements for state rail projects. If a district receives comments or questions from rail shippers or locals concerned about the future of rail service in their community or other rail issues, the comments or questions should be directed to the State Rail Planner. District involvement is primarily in the area of construction engineering to monitor and oversee project construction.

Choose to Drive Sober

Highway Safety Program

For more information contact:
Highway Safety Manager
Office of Highway Safety
Phone: (208) 334-8100
FAX: (208) 334-4430

Description of the Program

The Office of Highway Safety administers the federal Highway Safety Grant Program, which is funded by formula through the Transportation Equity Act for the 21st Century (TEA-21) of 1998 and the Highway Safety Act of 1966. The goal of the program is to reduce deaths and serious injuries resulting from motor-vehicle collisions by implementing programs designed to address driver behaviors. The purpose of the program is to provide grant funding at the state and community level for a highway safety program that addresses Idaho's own unique circumstances and particular highway safety needs.

Process Descriptions

Traffic Safety Problem Identification

A "traffic safety problem" is an identifiable subgroup of drivers, pedestrians, vehicles, or roadways that is statistically higher in collision experience than normal expectations. Problem identification involves the study of relationships between collisions and the population, licensed drivers, registered vehicles and vehicle miles, as well as characteristics of specific subgroups that may contribute to collisions.

In the fall of 1996, Office of Highway Safety (OHS) staff and the Idaho Traffic Safety Commission (ITSC) jointly developed a three-year safety plan for FY 1998-2000. In accordance with federal requirements, one element of the plan was to discuss how traffic safety problems would be identified and addressed over the course of the three years. The process used to identify traffic safety problems began initially by evaluating Idaho's experience in each of the National Highway Traffic Safety Administration's eight highway safety priority areas. These

were program areas determined by NHTSA to be most effective in reducing motor-vehicle collisions, injuries, and deaths. Consideration for other potential traffic safety problem areas came from problems noted by Idaho Traffic Safety Commission members, Office of Highway Safety staff, and by researching issues identified by other states.

Comparison data was developed, where possible, on costs of collisions, number of collisions, and the number of deaths and injuries. Supplementary data was gathered from the Idaho State Accident Database on helmet use for motorcycles and bicycles, child safety-restraint use, seat-belt use, and from available violation, license suspension, and arrest information.

Fifteen potential traffic-safety problem areas were studied extensively. Ultimately, Idaho's eight most critical traffic-safety problems were identified. The areas were selected on the basis of the severity of the problem, economic costs, availability of grantee agencies to conduct successful programs, and other supportable conclusions drawn from the traffic safety-problem identification process.

Establishing Goals and Performance Measures

The primary goal of the highway safety grant program has been and will continue to be reducing motor-vehicle deaths and serious injuries. The results of the problem-identification process are used by staff to assure that resources are directed to areas most appropriate for achieving the primary goal. In addition to the primary goal, staff responsible for each focus area establish secondary long-term goals through the year 2000 and near-term goals for the current fiscal year.

In October 1996, the Idaho Traffic Safety Commission voted to accept the FY 1998-2000 Idaho Focus Areas and approved the targeted funding ranges anticipated to be programmed over the three years. These were:

<u>Focus Area</u>	<u>Target Funding Range</u>
Impaired Drivers	15-20%
Safety-Restraint Use	20-30%
Risky Driver Behavior	15-25%
Youthful Drivers	5-15%
Bicycle and Pedestrian Safety	3-5%
Roadway Safety/Traffic Records	8-20%
Emergency Medical Services	5-10%

Each October, the ITSC reviews the identified focus areas, goals, and funding ranges. Adjustments for the upcoming fiscal year, as warranted and supported by data analysis, are made at that time. Progress toward achieving goals is presented and reviewed by the ITSC each June.

Project Development

The annual project-selection process begins by notifying state and local public agencies involved in traffic-related activities of the availability of grant funds. A Request for Proposal (RFP) reflecting the focus areas considered for funding is released each January. Grant applicants must complete and submit a Letter of Intent in accordance with the information provided on the form by the end of February. Copies of the application form and instructions are provided at the end of this section.

Once the application period has closed, potential projects are first sorted according to the focus area that most closely fits the project. Staff develop priority and funding recommendations using criteria that assesses each project's potential to:

- make a reduction in traffic collisions,
- reduce the severity of traffic collision injuries,
- improve the operation of an important traffic safety system,
- fit in as part of an integrated communitywide collision-reduction project, and
- increase the coordination of efforts between several traffic safety agencies.

Funding recommendations are incorporated into the *Statewide Transportation Improvement Program* (STIP) and presented to the ITSC and the Idaho Transportation Board each June. Final project adjustments are made after a 30-day public comment period is complete. The Idaho Transportation Board approves the Highway Safety Plan in August. A flow chart depicting the entire process is contained on the following page.

Overview Of The Highway Safety Plan Process

FLOW	TIME	PURPOSE
Traffic Safety Problem Identification Activities	September	Analyze data – causes and trends. Define problems and problem areas of state.
ITSC/Staff Planning Session	October	Review identified focus areas, goals and funding ranges. Modify as necessary and supportable by data analysis. Determine and approve funding distribution for focus area, and overall direction of program.
Grant Application Period	January/February	Provide notice of fund availability and solicit applications for targeted problem areas.
Draft 1999-2000 Highway Safety Plan (HSP)	March/April/ May	Clarify project proposals, prioritize projects, and develop draft language and spending plans.
ITSC Approval	June	ITSC formal approval of the 2000 Highway Safety Plan. Last preparations before submittal to Transportation Board within the <i>Statewide Transportation Improvement Program (STIP)</i> document.
Public Notification Period for STIP	July	Public comment period required by law.
Transportation Board Approval	August	Formal approval is through the Transportation Board. Allows OHS to start grant process. HSP due NHTSA/FHWA.
Projects Start	October	Field implementation.

Goals and Performance Measures

Mission Statement

To reduce deaths and injuries from motor-vehicle crashes through funding highway safety programs and activities that promote safe driving behaviors, and through maintaining and disseminating reliable accident statistics.

Primary Goal

Reduce traffic-related deaths and serious injuries

Primary Performance Measures and Benchmarks

Reduce traffic-related deaths per 100 million vehicle miles traveled (VMT)

1995 Benchmark	-	2.13
2000 Goal	-	2.04

Reduce traffic-related serious injuries per 100 million VMT

1995 Benchmark	-	16.31
2000 Goal	-	15.50

Strategy

The strategy used to reach the primary goal is to identify secondary goals for each focus area that will cumulatively accomplish the primary goal. Performance measures are also identified. For measurement purposes, 1995 has been used as the benchmark year, with targeted objectives identified for 2000.

Impaired Driving

Goal statement: To reduce the alcohol-involved death and serious injury rate per 100 million VMT.

1995 Benchmark	-	4.12
2000 Objective	-	4.00

Safety-Restraint Use

Goal statement: To increase the statewide average combined seat belt use percentage.

1995 Benchmark	-	50.0
2000 Objective	-	59.0

Risky Driving Behaviors

Goal statement: To reduce the risky driver behavior involved death and serious injury rate per 100 million VMT.

1995 Benchmark	-	8.68
2000 Objective	-	8.50

Youthful Drivers

Goal statement: To reduce the youthful driver death and serious injury rate per 100 million VMT.

1995 Benchmark	-	5.18
2000 Objective	-	5.10

Bicycle and Pedestrian Actions

Goal statement: To reduce the percentage of bicycle-related deaths and serious injuries of all traffic-related fatalities and serious injuries.

1995 Benchmark	-	2.52
2000 Objective	-	2.35

Goal statement: To reduce the percentage of pedestrian-related deaths and serious injuries of all traffic-related fatalities and serious injuries.

1995 Benchmark	-	3.87
2000 Objective	-	3.75

Traffic Records and Roadway Safety Systems

Goal statement: To increase the number of agencies using the Traffic Records System.

1995 Benchmark	-	39
2000 Objective	-	100

Goal statement: To increase the number of safety improvements to the Roadway Safety Network.

1995 Benchmark	-	5
2000 Objective	-	8

Emergency Medical Service Systems

Goal statement: To provide improvements that enhance local EMS extrication and communication capabilities.

1995 Benchmark	-	12
2000 Objective	-	8

Certifications and Assurances

In accordance with 49 CFR 18.11(c), I hereby certify that the state of Idaho will comply with all applicable federal statutes and regulations, and give assurances that:

1. The Governor is responsible for the administration of the state highway safety program through a state highway safety agency which has adequate powers and is suitably equipped and organized (as evidenced by appropriate oversight procedures governing such areas as procurement, financial administration and the use, management and disposition of equipment) to carry out the programs under 23 USC 402 (b)(1)(A).
2. The political subdivisions of this state are authorized, as part of the state highway safety program, to carry out within their jurisdictions local highway safety programs which have been approved by the Governor and are in accordance with the uniform guidelines promulgated by Secretary of Transportation in compliance with 23 USC 402(b)(1)(B).
3. At least 40 per centum of all federal funds apportioned to this state under 23 USC 402 for this fiscal year will be expended by or for the benefit of the political subdivisions of the state in carrying out local highway safety programs authorized in accordance with 23 USC 402(b)(1)(C), unless this requirement is waived by the Secretary of Transportation.
4. This state's highway safety program provides adequate and reasonable access for the safe and convenient movement of physically handicapped persons, including those in wheelchairs, across curbs constructed or replaced on or after July 1, 1976, at all pedestrian crosswalks to comply with 23 USC 402 (b)(1)(D).
5. This state's highway safety program provides for programs to encourage the use of safety belts by drivers of, and passengers in, motor vehicles to comply with 23 USC 402 (b)(1)(E).
6. The state highway safety agency will comply with Title VI of the Civil Rights Act of 1964 and Section 504 of the Rehabilitation Act of 1973, as amended, as implemented by 49 CFR Part 26, to ensure that no person in the United States shall, on the grounds of race, color, national origin, or handicap, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under this program.
7. Cash drawdowns will be initiated only when actually needed for disbursements; cash disbursements and balances will be reported in a timely manner as required by NHTSA; and the same standards of timing and amount, including the reporting of cash disbursements and balances, will be imposed upon any secondary recipient organizations in accordance with 49 CFR 18.21 and 18.40 (failure to adhere to these provisions may result in the termination of advance financing).
8. Arrangements have been made for the financial and compliance audit required by the Single Audit Act of 1984 (OMB Circular A-133), which is to be conducted within the prescribed

audit reporting cycle (failure to furnish an acceptable audit, as determined by the cognizant federal agency, may result in denial or require return of federal funds).

9. This Highway Safety Plan will not be subject to intergovernmental review. The state of Idaho has elected to suspend its process for intergovernmental review of federal programs as allowed under Executive Order 12372.
10. Equipment acquired under this agreement for use in highway safety program areas shall be used and kept in operation for highway safety purposes by the state; or the state, by formal agreement with appropriate officials of a political subdivision or state agency, shall cause such facilities and equipment to be used and kept in operation for highway safety purposes.
11. The state is funding programs that are within NHTSA/FHWA national priority program areas.
12. Each recipient of funds has an acceptable financial management system that complies with the minimum requirements of 49 CFR Part 18.20.
13. Each recipient of funds has a procurement system that complies with the minimum requirements of 49 CFR Part 18.

In accordance with the Drug-Free Workplace Act of 1988 (49 CFR Part 29 Subpart F), the grantee certifies that it will provide a drug-free workplace by:

1. Publishing a statement notifying employees that the unlawful manufacture, distribution, dispensing, possession, or use of a controlled substance is prohibited in the grantee's workplace and specifying the actions that will be taken against employees for violation of such prohibition.
2. Establishing a drug-free awareness program to inform employees about:
 - a. The dangers of drug abuse in the workplace;
 - b. The grantee's policy of maintaining a drug-free workplace;
 - c. Any available drug counseling, rehabilitation, and employee-assistance programs; and
 - d. The penalties that may be imposed upon employees for drug-abuse violations occurring in the workplace.
3. Making it a requirement that each employee engaged in the performance of the grant be given a copy of the statement required by paragraph 1.
4. Notifying the employee in the statement required by paragraph 1 that, as a condition of employment under the grant, the employee will:
 - a. Abide by the terms of the statement; and

- b. Notify the employer of any criminal drug statute conviction for a violation occurring in the workplace no later than five days after such conviction.
5. Notifying the agency within ten days after receiving notice under subparagraph 4 (b) from an employee or otherwise receiving actual notice of such conviction.
6. Taking one of the following actions within 30 days of receiving notice under subparagraph 4(b) with respect to any employee who is so convicted.
 - a. Taking appropriate personnel action against such an employee, up to and including termination; or
 - b. Requiring such employee to participate satisfactorily in a drug abuse assistance or rehabilitation program approved for such purposes by a federal, state or local health, law enforcement or other appropriate agency.
7. Making a good faith effort to continue to maintain a drug-free workplace through implementation of paragraphs 1, 2, 3, 4, 5, and 6.

In accordance with the provisions of the Buy America Act, the state will comply with the reference 23 USC 101 Note and the federal governmentwide reference 23 USC 10a.

Only steel, iron and manufactured items produced in the United States may be purchased with Federal funds unless the state can show that such domestic purchases would be inconsistent with the public interest; that such materials are not reasonably available and are of an unsatisfactory quality; or that inclusion of domestic materials will increase the cost of the overall project contract by more than 25 percent. Clear justification for the purchase of non-domestic items must be in the form of a waiver request submitted to and approved by the Secretary of Transportation.

In accordance with the provisions of 49 CFR Part 23, the state agrees to abide by the following statements, and shall ensure that these statements are included in all subsequent agreements and/or contracts assisted by Section 402 funds:

1. It is the policy of the U.S. Department of Transportation that minority business enterprises, as defined in 49 CFR Part 23, shall have the maximum opportunity to participate in the performance of contracts financed in whole or in part with federal funds under this agreement. Consequently, the MBE requirements of 49 CFR Part 23 apply to this agreement.
2. The recipient or its contractor agrees to ensure that minority business enterprises as defined in 49 CFR Part 23 have the maximum opportunity to participate in the performance of contracts and subcontracts financed in whole or in part with federal funds provided under this agreement. In this regard, all recipients or contractors shall take all necessary and reasonable steps in accordance with 49 CFR Part 23 to ensure that minority business enterprises have the maximum opportunity to compete for and perform contracts. Recipients and their contractors

shall not discriminate on the basis of race, color, national origin, or sex in the award and performance of DOT-assisted contracts.

In accordance with the provisions of 49 CFR Part 29, the state agrees that it shall not knowingly enter into any agreement under its Highway Safety Plan with a person or entity that is barred, suspended, declared ineligible, or voluntarily excluded from participation in the Section 402 program, unless otherwise authorized by NHTSA. The state further agrees that it will include the following clause and accompanying instruction, without modification, in all lower-tier covered transactions, as provided by 49 CFR Part 29, and in all solicitations for lower-tier covered transactions.

Instructions for Certification:

1. By signing and submitting this proposal, the prospective lower-tier participant is providing the certification set out below.
2. The certification in this clause is a material representation of fact upon which reliance was placed when this transaction was entered into. If it is later determined that the prospective lower-tier participant knowingly rendered an erroneous certification, in addition to other remedies available to the federal government, the department or agency with which this transaction originated may pursue available remedies, including suspension and/or debarment.
3. The prospective lower-tier participant shall provide immediate written notice to the person to which this proposal is submitted if at any time the prospective lower-tier participant learns that its certification was erroneous when submitted or has become erroneous by reason of changed circumstances.
4. The terms, *covered transaction, debarred, suspended, ineligible, lower-tier covered transaction, participant, person, primary covered transaction, principal, proposal, and voluntarily excluded*, as used in this clause, have the meanings set out in the Definition and Coverage section of 49 CFR Part 29. You may contact the person to whom this proposal is submitted for assistance in obtaining a copy of those regulations.
5. The prospective lower-tier participant agrees by submitting this proposal that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower-tier covered transaction with a person who is debarred, suspended, declared ineligible, or involuntarily excluded from participation in this covered transaction, unless authorized by the department or agency with which this transaction originated.
6. The prospective lower-tier participant further agrees by submitting this proposal that it will include the below clause entitled "Certification Regarding Debarment, Suspension, Ineligibility, and Voluntary Exclusion — Lower-tier Covered Transactions," without

modifications, in all lower-tier covered transactions and in all solicitations for lower-tier covered transactions.

7. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower-tier covered transaction that it is not debarred, suspended, ineligible, or voluntarily excluded from the covered transaction, unless it knows the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Nonprocurement List.
8. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.
9. Except for transactions authorized under paragraph 5 of these instructions, if a participant in a covered transaction knowingly enters into a lower-tier covered transaction with a person who is suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the federal government, the department or agency with which this transaction originated may pursue available remedies, including suspension and/or debarment.

Certification Regarding Debarment, Suspension, Ineligibility, and Voluntary Exclusion — Lower-tier covered Transactions

1. The prospective lower-tier participant certifies, by submission of this proposal, that neither it nor its principals is presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in this transaction by any federal department or agency.
2. Where the prospective lower-tier participant is unable to certify to any of the statements in this certification, such prospective participants shall attach an explanation to this proposal.

In accordance to certification regarding lobbying, the undersigned certifies, to the best of his or her knowledge and belief, that:

1. No federal appropriated funds have been paid or will be paid, by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any agency, a member of Congress, an officer or employee of Congress, or an employee or member of Congress in connection with the awarding of any federal contract, the making of any federal grant, the making of any federal loan, the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any federal contract, grant, loan, or cooperative agreement.

2. If any funds other than federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a member of Congress, an officer or employee of Congress, or an employee of a member of Congress in connection with this federal contract, grant, loan, or cooperative agreement, the undersigned shall complete and submit Standard Form LLL, "Disclosure Form to Report Lobbying," in accordance with its instructions.
3. The undersigned shall require that the language of this certification be included in the award documents for all subawards at all tiers (including subcontracts, subgrants, and contracts under grants, loans, and cooperative agreements) and that all subrecipients shall certify and disclose accordingly.

This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by Section 1352, Title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than \$10,000 and not more than \$100,000 for each such failure.

In accordance with 42 USC 4321 the Governor's Representative for Highway Safety has reviewed the state's Fiscal Year 2000 Highway Safety Plan and hereby declares that no significant environmental impact will result from implementing this Highway Safety Plan. If, under a future revision, this Plan will be modified in such a manner that a project would be instituted that could affect environmental quality to the extent that a review and statement would be necessary, this office is prepared to take the action necessary to comply with the National Environmental Policy.

Report

FY 2000

Prepared by the Office of Highway Safety

Statewide

The Problem

- In 1997, 259 people were killed and 14,133 people were injured in traffic collisions in Idaho. 40% of the fatalities involved alcohol and/or other drugs.
- In 1997, 56% of the fatal crashes involved a single vehicle.
- In 1997, observational studies showed that only 49% of Idaho motor vehicle occupants were wearing their safety belt.

Idaho Traffic Collision Data and Measures of Exposure, 1995-1997

	1995	1996	1997	% Change 1995-1997
Total Collisions	21,135	23,529	23,839	+12.8
Fatalities	262	258	259	-1.1
Serious Injuries	1,959	1,842	1,894	-3.3
Visible Injuries	6,306	5,013	5,245	-16.8
Possible Injuries	8,171	7,420	6,994	-14.4
Fatalities per 100 Million VMT	2.1	2.0	2.0	-4.8
Injuries per 100 Million VMT	133.7	110.5	107.8	-19.4
Measures of Exposure				
Population (thousands)	1,163	1,189	1,210	+4.0
Vehicle Miles Traveled (millions)	12,297	12,924	13,112	+6.6
Licensed Drivers (thousands)	814	828	852	+4.7
Registered Vehicles (thousands)	1,210	1,234	1,260	+4.1

Economic Costs* of Idaho Collisions, 1997

Incident Description	Total Occurrences	Cost Per Occurrence	Cost Per Category
Fatalities	259	\$2,600,000	\$673,400,000
Serious Injuries	1,894	\$180,000	\$340,920,000
Visible Injuries	5,245	\$36,000	\$188,820,000
Possible Injuries	6,994	\$19,000	\$132,886,000
Property Damage Only Collisions	14,508	\$2,000	\$29,016,000
Total Estimate of Economic Costs			\$1,365,042,000

*Economic Costs include: property damage, lost earnings, lost household production, medical, emergency services, travel delay, vocational rehabilitation, workplace, administrative, legal, and pain and lost quality of life. Based on 1994 estimates released by the Federal Highway Administration.

Prepared by: Office of Highway Safety, Idaho Transportation Department. Report is based on information provided by law enforcement agencies on collisions resulting in injury, death, or damage to one person's property in excess of \$750.

Statewide Continued

Fatal and Injury Collision Involvement by Age of Driver, 1997

Age of Driver	# of Drivers in F&I Collisions	% of Drivers in F&I Collisions	# of Licensed Drivers	% of Total Drivers	Over/Under Representation*
19 and Under	3,411	21.7	76,704	9.0	2.4
20-24	2,128	13.5	79,075	9.3	1.5
25-34	3,004	19.1	154,305	18.1	1.1
35-44	2,736	17.4	182,176	21.4	0.8
45-54	1,947	12.4	150,110	17.6	0.7
55-64	1,053	6.7	94,066	11.0	0.6
65 and Over	1,187	7.6	115,769	13.6	0.6
Missing	244	1.6			
Total	15,710		852,205		

*Representation is percent of drivers in fatal and injury collisions divided by percent of licensed drivers. Over representation occurs when the value is greater than 1.0.

Location of Idaho Collisions, 1995 - 1997

Roadway System Vehicle Miles Traveled	1995	1996	1997	% Change 1995-1997
Local System:				
VMT (100 millions)	56.3	60.7	59.6	+5.9
Fatal Collision Rate	1.6	1.3	1.5	-6.3
Injury Collision Rate	98.5	81.3	87.9	-10.8
All Collision Rate	225.9	225.0	239.8	+6.2
State System (Non-interstate):				
VMT (100 millions)	37.6	38.5	42.7	+13.6
Fatal Collision Rate	2.7	3.0	2.0	-25.9
Injury Collision Rate	70.9	66.4	59.9	-15.5
All Collision Rate	152.3	164.5	149.4	-1.9
Interstate System:				
VMT (100 millions)	29.1	30.0	28.8	-1.0
Fatal Collision Rate	1.3	1.3	1.6	+23.1

Fatal Collision Rate	1.9	1.8	1.7	-10.5
Injury Collision Rate	77.0	68.7	69.5	-9.7
All Collision Rate	171.9	182.1	181.8	+5.8

Prepared by: Office of Highway Safety, Idaho Transportation Department. Report is based on information provided by law enforcement agencies on collisions resulting in injury, death, or damage to one person's property in excess of \$750.

Safety Restraints

The Problem

- In 1997, only 49% of Idahoans were using seat belts, according to the Idaho Safety Belt Observational Survey. This is a slight drop from 50% usage in the previous two years.
- In 1997, seat belt usage varied by region around the state from a high of 61% in District 3 (southwestern Idaho) to a low of 34% in District 6 (northeastern Idaho).
- The Office of Highway Safety uses observational data for restraint use because there is a tendency for persons involved in collisions to falsely report compliance with the seat belt law and thus self-reported use tends to overstate actual use. Law enforcement officers and emergency personnel are more likely to observe and report restraint use in collisions resulting in death or serious injuries and thus more reliable data is available for these types of injuries.
- In 1997, only 22% of those individuals killed in passenger cars, pickups and vans were wearing seat belts. The National Highway Traffic Safety Administration estimates that a person not wearing a seat belt is nearly twice as likely to incur a fatal or serious injury than a person wearing a seat belt. By this estimate, we can deduce that 45 lives were saved in Idaho in 1997 because they were wearing their seat belt and an additional 80 lives could have been saved if everyone were to wear their seat belt.
- Self-reported restraint use for children under the age of four who were riding in cars, pickups, vans, and sport utility vehicles that were involved in collisions rose from 61% to 67% in 1997.

Occupant Protection in Idaho, 1995 - 1997

	1995	1996	1997	% Change 1995-1997
Safety Belt Observation Survey				
District 1	58%	62%	59%	+1.7
District 2	57%	58%	51%	-10.5
District 3	56%	59%	61%	+8.9
District 4	48%	38%	39%	-18.8
District 5	34%	34%	35%	+2.9
District 6	40%	42%	34%	-15.0
Statewide Weighted Average*	50%	50%	49%	-2.0
Seat Belt Use - Age 4 and Older - Passenger Cars, Pickups, Vans and Sport Utility vehicles				
In Fatal Collisions	27.9%	28.0%	22.0%	-21.1
In Serious Injury Collisions	46.0%	46.4%	46.7%	+1.5
Self-Reported Child Restraint Use Under Age 4 in Cars, Pickups, Vans and Sport Utility Vehicles	49.2%	61.0%	67.4%	+37.0

*Weights are assigned based on vehicle miles traveled in each district.

Prepared by: Office of Highway Safety, Idaho Transportation Department. Report is based on information provided by law enforcement agencies on collisions resulting in injury, death, or damage to one person's property in excess of \$750

Impaired Driving

The Problem

- There was a 6% decrease from 1996 to 1997 in the number of impaired driving collisions. In 1997, 40% of the fatalities in Idaho involved impaired driving. This represents a 25% increase from 1996. Only 7% of the persons killed in collisions where alcohol and/or drugs was cited as a contributing circumstance were wearing their seat belts.
- In 1997, drivers under the age of 21 were involved in 16% of the alcohol-involved collisions.
- DUI arrests in Idaho in 1997 decreased by almost 9 percent from 1996 with local agencies showing an decrease of just over 12 percent.
- Based on 1994 cost estimates issued by the Federal Highway Administration, impaired-driving collisions cost Idahoans \$364,792,000. This represents 27% of the total economic costs of collisions.

Impaired Driving in Idaho, 1995 - 1997

	1995	1996	1997	% Change 1995-1997
Total Impaired Driving Collisions	1,787	1,893	1,776	-0.6
Fatalities	78	83	104	+33.3
Serious Injuries	429	383	332	-22.6
Visible Injuries	775	792	642	-17.2
Possible Injuries	632	586	530	-16.1
All Fatal and Injury Collisions	9,701	9,108	9,331	-3.8
Impaired Driving Fatal and Injury Collisions	1,170	1,153	1,051	-10.2
% Impaired Driving	12.1%	12.7%	11.3%	-6.6
Impaired Driving Collisions as a % of All Collisions	8.5%	8.1%	7.4%	-12.9
Impaired Driving Fatalities as a % of All Fatalities	29.8%	32.2%	40.2%	+34.9
Impaired Driving Injuries as a % of All Injuries	11.2%	12.3%	10.6%	-5.4
Impaired Driving Fatality and Serious Injury Rate per 100 Million Vehicle Miles of Travel	4.12	3.61	3.33	-19.2
Annual DUI Arrests by Agency				
Idaho State Police	1,887	1,838	1,984	+5.1
Local Agencies	8,998	9,359	8,230	-8.5
Total Arrests	10,855	11,197	10,214	-5.9
DUI Arrests as a % of All Idaho Licensed Drivers	1.33	1.35	1.20	-9.8

Prepared by: Office of Highway Safety, Idaho Transportation Department. Report is based on information provided by law enforcement agencies on collisions resulting in injury, death, or damage to one person's property in excess of \$750.

Risky Driver Behavior

Definition

- Risky driver behaviors include: Failure to Yield Right of Way, Passed Stop Sign, Exceeded Posted Speed, Driving Too Fast For Conditions, Following Too Close, Hit and Run, Disregarded Signal. Speeding is only one symptom of risky driver behavior. Risky drivers not only speed, but follow too close, run red lights, etc..
- Risky driver behavior collisions include those collisions where an officer indicates that risky driver behaviors may have contributed to the collision. Up to three contributing circumstances are possible for each vehicle in a collision, thus the total number of collisions attributed to these behaviors is less than the sum of the individual components.

The Problem

- As vehicle miles traveled increase, and traffic delays become longer, drivers appear to take more chances in their driving.
- Total collisions involving risky driver behavior increased 10% from 1995 to 1997, however, fatalities involving risky driver behaviors decreased 13%.
- In 1997, economic costs of collisions involving risky driver behaviors were \$754,155,000. This represents 55% of the total economic costs of collisions.

Risky Driver Behavior in Idaho, 1995-1997

	1995	1996	1997	% Change 1995-1997
Total Risky Driver Behavior Collisions	13,134	14,790	14,478	+10.2
Fatalities	150	157	131	-12.7
Serious Injuries	1,161	1,137	1,063	-8.4
Visible Injuries	3,939	3,175	3,233	-17.9
Possible Injuries	5,625	5,147	4,649	-17.4
Number of Traffic Fatalities and Serious Injuries Involving:*				
Driving Too Fast for Conditions (Dry Roads)	439	453	439	0.0
Failure to Yield Right of Way	403	402	366	-9.2
Exceeded Posted Speed	303	292	202	-33.3
Passed Stop Sign	147	113	118	-19.7
Following Too Close	96	89	96	0.0
Disregarded Signal	55	63	70	+27.3
Hit and Run	21	16	24	+14.3
Risky Driver Fatality and Serious Injury Rate per 100 Million Vehicle Miles of Travel	10.66	10.01	9.11	-14.5

* Three contributing circumstances possible per unit involved in each collision.

Prepared by: Office of Highway Safety, Idaho Transportation Department. Report is based on information provided by law enforcement agencies on collisions resulting in injury, death, or damage to one person's property in excess of \$750.

Youthful Drivers

The Problem

- In 1997, drivers, age 15 – 19, represented 9% of the licensed drivers in Idaho yet were involved in 19% of the fatal and serious injury collisions.
- In 1997, youthful drivers were involved in 12% of the alcohol-involved collisions, even though they were too young to legally consume alcohol.
- National and International research indicates that youthful drivers are more likely to be in single vehicle crashes, to have made one or more driver errors, to be speeding (exceeding posted speed or too fast for conditions), and carry more passengers than any other age group.
- National research shows the injury problem for youthful drivers and passengers is affected by the fact that they drive older and smaller cars that are less protective and because they are less likely to wear seat belts.
- In 1997, economic costs of collisions involving youthful drivers were \$372,709,000. This represents 27% of the total economic costs of collisions.

Youthful Drivers on Idaho Highways, 1995 - 1997

	1995	1996	1997	% Change 1995-1997
Total Youthful Driver Collisions	6,851	7,294	7,563	+10.4
Fatalities	72	54	58	-19.4
Serious Injuries	566	585	539	-4.8

Total Drivers 19 & Under Fatal Alcohol-Involved Collisions	8	4	15	+87.5
% Fatal Alcohol-Involved Collisions	12.9%	7.8%	28.9%	+124.0
Drivers 15-19 Fatality and Serious Injury Rate per 100 Million Vehicle Miles of Travel	5.18	4.94	4.55	-12.2

* Representation is percent of fatal and injury collisions divided by percent of licensed drivers. Over-representation occurs when the value is greater than 1.0.

Prepared by: Office of Highway Safety, Idaho Transportation Department. Report is based on information provided by law enforcement agencies on collisions resulting in injury, death, or damage to one person's property in excess of \$750.

Pedestrians and Bicyclists

The Problem

- In 1997, 20 pedestrians and bicyclists were killed in traffic collisions. This represented 8% of all traffic fatalities in Idaho. There were 558 traffic collisions involving pedestrians and bicyclists, which represents 2% of all traffic collisions.
- Children age 4 to 14 accounted for 29% of the fatalities and injuries received in pedestrian collisions and 41% of the fatalities and injuries received in bicycle collisions.
- Over the past few years, bicycling has gained popularity as an alternative travel method, as a form of exercise, and as a recreational sport. There are an increasing number of bicycle paths and trails throughout Idaho, which are accessed from roadways.
- In 1997, the economic costs of pedestrian and bicycle collisions in Idaho were \$84,981,000. This represents 6% of the total economic costs of traffic collisions.

Pedestrians and Bicyclists in Idaho, 1995 - 1997

	1995	1996	1997	% Change 1995-1997
Pedestrian Collisions	228	251	243	+6.6
Fatalities	18	13	19	+5.6
Serious Injuries	68	69	73	+7.4
Visible Injuries	106	105	98	-7.5
Possible Injuries	51	81	62	+21.6
Pedestrians in Collisions	246	269	253	+2.8
Pedestrian Fatalities and Serious Injuries as a % of All Fatalities and Serious Injuries	3.9%	3.9%	4.3%	+10.3
Bicycle Collisions	325	320	315	-3.1
Fatalities	2	3	1	-66.7
Serious Injuries	54	44	38	-29.6
Visible Injuries	172	165	182	+5.9
Possible Injuries	95	109	91	-4.2
Bicyclists in Collisions	331	327	325	-1.8
Helmet Use - All Bicyclists in Collisions	30	27	32	+6.7
% of Bicyclists Wearing Helmets	11.0%	8.3%	9.8%	-10.9
Bicycle Fatalities and Serious Injuries as a % of All Fatalities and Serious Injuries	2.5%	2.2%	1.8%	-28.2

Prepared by: Office of Highway Safety, Idaho Transportation Department. Report is based on information provided by law enforcement agencies on collisions resulting in injury, death, or damage to one person's property in excess of \$750.

Roadway / Traffic Safety

The Problem

- It is very difficult to quantify the problem with statistics.
- As new technologies emerge, OHS plans to take advantage of them in the collection and dissemination of collision data.
- Electronically transferring vehicle collision reports from local law enforcement agencies to OHS would reduce data entry time and create a storage database for local law enforcement to eliminate the need to keep paper copies of the collision reports.
- Continue to provide help to local highway jurisdictions to improve safety on their roadways.
- Many traffic databases, both in and outside ITD, which, if linked, could provide valuable information to help OHS more precisely direct our limited resources.
- Maintain and upgrade the Idaho Mobile Program for Accident Collection.

Emergency Medical Services

The Problem

- The availability and quality of services provided by local Emergency Medical Services may mean the difference between life and death for someone that is injured in a traffic collision. Improved post-crash victim care works to reduce the severity of trauma incurred by collision victims. The sooner someone receives appropriate medical care, the better the chances of recovery. This care is especially critical in rural areas because of the time needed to transport a victim to a trauma hospital.
- Idaho currently does not have a statewide trauma registry for collecting data on causes of injuries, injury severity, costs, and payment providers. This information would provide information on actual costs associated with traffic collisions and could be used to determine costs of specific kinds of collisions (pedestrian, motorcycle and bicycle).
- The Office of Highway Safety (OHS) has concentrated funding on training efforts, upgrading communications equipment and purchasing extrication equipment.

Emergency Medical Services in Idaho, 1995 - 1997

	1995	1996	1997	% Change 1995-1997
Total Collisions	21,135	23,529	23,839	+12.8
EMS Response to Collisions	4,858	5,018	5,819	+19.8
% of Collisions	23.0%	21.3%	24.4%	+6.1
Persons Injured in Collisions	16,436	14,275	14,133	-14.0
Persons Transported by EMS	6,121	6,061	6,317	+3.2
% of Injured Transported	37.2%	42.5%	44.7%	+20.2
Persons Trapped and Extricated	483	561	535	+10.8
Persons with Serious/Fatal Injuries Transported by Helicopter	144	122	148	+2.8

Prepared by: Office of Highway Safety, Idaho Transportation Department. Report is based on information provided by law enforcement agencies on collisions resulting in injury, death, or damage to one person's property in excess of \$750.

Motorcyclists

The Problem

- In 1997, the number of motorcycle collisions fell slightly from 1996 levels while the number of persons killed rose from 12 to 17.
- In 1997, motorcycle collisions accounted for 1% of the total number of collisions and less than 1% of persons involved in collisions, yet accounted for 7% of all persons killed in traffic collisions.
- Idaho code requires all motorcycle operators and passengers under the age of 18 to wear a helmet. In 1997, only 13 of 22 (41%) of under age 18 operators and passenger were wearing helmets when they were in a collision.
- In 1997, only 31% of all motorcyclists involved in traffic collisions were wearing helmets.
- In 1997, the economic costs associated with motorcycle collisions were \$68,897,000. This represents 5% of the total economic cost of traffic collisions.

Motorcyclists in Idaho, 1995 - 1997

	1995	1996	1997	% Change 1995-1997
Motorcycle Collisions	330	328	307	-7.0
Fatalities	18	12	17	-5.6
Serious Injuries	115	110	104	-9.6
Visible Injuries	161	163	130	-19.3
Possible Injuries	58	64	65	+12.1
Motorcyclists in Collisions	402	386	361	-10.2
Registered Motorcycles	33,970	33,700	34,933	+2.8
Helmet Use All Motorcyclists in Collisions	119	117	110	-7.6
% of Motorcyclists Wearing Helmets	29.6%	30.3%	30.5%	+3.0

Heavy Trucks

Definition

- Both weight and configuration are used to define heavy trucks. Heavy trucks are defined as vehicles primarily used for the transportation of property and represented by one or more of the following characteristics: weight in excess of 8,000 pounds, having more than two axles or more than two tires on any axle.

The Problem

- In 1997, 35 people were killed as a result of a collision with a heavy truck. This is 14% of all the fatalities in Idaho. In 1997, 83% of the people killed in collisions with heavy trucks were occupants of passenger cars, pickups, and vans.
- In 1997, 97% of the fatal heavy truck collisions and 64% of all truck collisions occurred on rural roadways. Rural roadways are defined as any roadway located outside the city limits of cities with a population of 5,000 or more.
- In 1997, the economic costs of truck collisions in Idaho were \$131,345,000. This represents 10% of the total economic costs of traffic collisions.

Truck Collisions in Idaho, 1995 - 1997

	1995	1996	1997	% Change 1995-1997
Total Collisions	1,313	1,666	1,566	+19.3
Fatalities	41	40	35	-14.6
Serious Injuries	148	137	122	-17.6
Visible Injuries	271	315	286	+5.5
Possible Injuries	373	374	315	-15.5
Commercial Vehicle Miles Traveled (millions)	1,711	1,853	1,876	+9.6
% of All Vehicle Miles Traveled	13.9%	14.3%	14.3%	+2.8
Fatalities per 100 Million Commercial VMT	2.39	2.16	1.87	-21.8
Injuries per 100 Million Commercial VMT	46.29	44.58	38.54	-16.7

Prepared by: Office of Highway Safety, Idaho Transportation Department. Report is based on information provided by law enforcement agencies on collisions resulting in injury, death, or damage to one person's property in excess of \$750.

Speed

Definition

- Collisions involving speed are those where an officer indicates that one or more of the drivers was exceeding the posted speed or driving too fast for conditions and these factors contributed to the cause of the collision.

The Problem

- In 1997, youthful drivers were involved in 29% of the collisions where speed was a contributing factor.
- In 1997, 58% of the collisions involving speed were single-vehicle collisions.
- In 1997, the economic costs resulting from collisions involving speed in Idaho were \$419,172,000. This represents 31% of the total costs of collisions.

Speed in Idaho, 1995 - 1997

	1995	1996	1997	% Change 1995-1997
Total Speed Collisions	4,558	5,927	5,238	+14.9
Fatalities	100	104	93	-7.0
Serious Injuries	597	612	518	-13.2
Visible Injuries	1,585	1,416	1,401	-11.6
Possible Injuries	1,819	1,807	1,454	-20.1
Total Collisions Exceeded Posted Speed*	1,072	997	904	-15.7
Total Collisions Speed Too Fast for Conditions*	3,633	5,072	4,480	+23.3
Speed Too Fast for Conditions - Number of Collisions Where Road Conditions Were:				
Ice	1,176	2,136	1,725	+46.7
Snow	439	994	555	+26.4
Wet	505	416	523	+3.6
Slush	242	258	248	+2.5
Mud	15	18	14	-6.7
Total Speed Collisions - Youthful Drivers	1,395	1,604	1,518	+8.8
% Speed Collisions with Youthful Drivers	30.6%	27.1%	29.0%	-5.3
Total Speed Collisions - Single Vehicle Collisions	2,681	3,199	3,018	+12.6
% Speed Collisions with Single Vehicles	58.8%	54.0%	57.6%	-2.0

*The number of Exceeded Posted Speed Collisions and Too Fast for Condition Collisions do not add up to the number of Total Speed Collisions since one collision may have both exceed posted speed and too fast for conditions as contributing circumstances.

Trains

The Problem

- Train-vehicle collisions are very dramatic when they happen, but they remain a very small part of the traffic collision problem in Idaho. The Federal Highway Administration is currently the lead agency for a program called "Operation Lifesaver". This public information campaign works closely with railroads and law enforcement agencies to raise awareness about the dangers of train-vehicle collisions.
- Operation Lifesaver and the Office of the Governor sponsored a program in 1996 to place special, highly reflective warning signs on all public at-grade crossings with passive warning devices. The IdaShields were manufactured by Idaho Correctional Industries using diamond grade reflective material from the 3-M Corporation that reflects light much better than ordinary reflective materials. The material was also applied to cross-buck signs at all public at-grade crossings. The estimated cost of this project was \$1.75 million and funding came from the Stripper Well Petroleum Violation Escrow Fund collected from petroleum companies that overcharged customers.
- In 1997, the economic costs resulting from train collisions in Idaho were \$16,210,000. This represents 1% of the total cost of collisions.

Train Collisions in Idaho, 1995 - 1997

	1995	1996	1997	% Change 1995-1997
Total Train Collisions	23	37	27	+17.4
Fatalities	6	5	6	0.0
Serious Injuries	8	6	2	-75.0
Visible Injuries	2	6	4	+100.0
Possible Injuries	4	8	4	0.0
Location of Collisions				
Rural Roads	17	23	20	+17.6
Urban Roads	6	14	7	+16.7

Single-Vehicle Collisions

The Problem

- In 1997, 30 percent of all collisions involved a single vehicle. The majority (81%) of these collisions occurred on rural roadways.
- In 1997, 53% of all fatalities were the result of a collision involving a single vehicle. Alcohol was involved in 45% of the 137 single vehicle fatalities.
- Overturned was by far the most harmful event attributed to single-vehicle collisions. Of the 86 people killed in single-vehicle collisions where overturned was designated as the most harmful event, only 13 (15%) were wearing a seat belt.
- In 1997, the economic costs associated with single-vehicle collisions were \$607,867,000. This represents 45% of the total cost of collisions.

Single-Vehicle Collisions in Idaho, 1995 - 1997

	1995	1996	1997	% Change 1995-1997
Total Single-Vehicle Collisions	6,290	7,142	7,213	+14.7
Fatalities	127	122	137	+7.9
Serious Injuries	818	740	796	-2.7
Visible Injuries	2,207	1,855	1,941	-12.1
Possible Injuries	1,793	1,723	1,597	-10.9
Location of Collisions				
Rural	5,015	5,802	5,829	+16.2
Urban	1,275	1,340	1,384	+8.5
Alcohol-involved Single-Vehicle Collisions	1,007	1,105	1,013	+0.6
% Single-Vehicle Collisions, Alcohol-involved	16.0%	15.5%	14.0%	-12.3
Youthful Driver Single Vehicle Collisions	1,575	1,621	1,702	+8.1
% Single Vehicle Collisions, Youthful Driver	25.0%	22.7%	23.1%	-5.8
Risky Driver Behavior* Single-Vehicle Collisions	2,871	3,349	3,181	+10.8
% Single-Vehicle Collisions, Risky Driver Behavior	45.6%	46.9%	44.1%	-5.4

* Risky Driver Behavior includes: Failure To Yield Right of Way, Passed Stop Sign, Exceeded Posted Speed, Driving Too Fast for Conditions (Dry Roads), Following Too Close, Hit and Run, and Disregarded Signal.

Mature Drivers

The Problem

- In 1997, drivers, age 65 and older, were involved in 1,187 fatal and injury collisions. Older drivers account for 14% of the total licensed drivers, but account for only 8% of all fatal and injury collisions. This results in an under-representation of this group in fatal and injury collisions.
- National research indicates drivers and passengers over 75 years old are more likely than younger persons to sustain injuries or death in traffic collisions because of their physical fragility.
- In 1997, the economic costs resulting from collisions involving mature drivers in Idaho were \$200,357,000. This represents 15% of the total cost of collisions.

Mature Drivers in Idaho, 1995 - 1997

	1995	1996	1997	% Change 1995-1997
Total Mature Driver Collisions	3,438	3,771	3,895	+13.3
Fatalities	45	41	41	-8.9
Serious Injuries	262	219	243	-7.3
Visible Injuries	883	618	706	-20.0
Possible Injuries	1,238	1,161	1,025	-17.2
Drivers 65 & older - Fatal & Injury Collisions	1,224	1,186	1,187	-3.0
% of Total Fatal & Injury Collisions	7.6%	7.8%	7.6%	-0.1
Licensed Drivers 65 & Older	113,228	112,341	115,769	+2.2
% of Total Licensed Drivers	13.9%	13.6%	13.6%	-2.2
Under-Representation of Drivers 65 & Older*	0.54	0.57	0.56	+3.7
Total Drivers 65 & Older Fatal Collisions	41	37	37	-9.8
Total Drivers 65 & Older Fatal Alcohol-Involved Collisions	2	1	2	0.0
% of Drivers 65 & Older Fatal Alcohol-Involved	4.9%	2.7%	5.4%	-10.2

* Representation is percent of fatal and injury collisions divided by percent of licensed drivers. Under-representation occurs when the value is less than 1.0.

Corridors

The Problem

- The Idaho Transportation Department Traffic Section identified 23 corridors in urban areas that have high traffic volumes and numerous collisions. These corridors are all part of the state highway system.
- In 1997, 2,247 collisions occurred on the selected corridors. This figure represents 9% of all collisions in Idaho. These collisions occurred on 101.227 miles of roadway, which is approximately 0.17% of all the road miles in Idaho.
- In 1997, 60% of the collisions on the corridors were property damage only collisions with no injuries or fatalities.
- In 1997, the economic costs resulting from collisions in selected corridors in Idaho were \$48,899,000. This represents 4% of the total cost of collisions.

Collisions on Selected Corridors in Idaho, 1995 - 1997

	1995	1996	1997	% Change 1995-1997
Traffic Collisions in Corridors	2,102	2,248	2,247	+6.9
Fatalities	14	7	3	-78.6
Serious Injuries	123	112	115	-6.5
Visible Injuries	466	432	453	-2.8
Possible Injuries	945	890	837	-11.4
Property Damage Only Collisions	1,150	1,344	1,346	+17.0
% of Total Corridor Collisions Which Were Property Damage Only	54.71%	59.79%	59.90%	+9.5

Corridors suggested by ITD Traffic Section included in the study:

US-95 in Coeur d'Alene	State St. in Boise
US-95 in Sandpoint (4 sections)	Eagle Rd near Boise
21st St. in Lewiston	US-20 (Chinden Blvd.) in Boise
SH-8 near Moscow	US-20 (Myrtle St.) in Boise
I-84 Caldwell to Boise	US-20 (Broadway Ave.) in Boise
Blaine St. in Caldwell	Fairview Ave. in Boise
Cleveland Blvd. in Caldwell	US-93 in Twin Falls
Caldwell Blvd. Caldwell to Nampa	SH-27 in Burley
2nd St. in Nampa	I-15B in Pocatello
SH-69 Kuna to Meridian	17th St. in Idaho Falls

Prepared by: Office of Highway Safety, Idaho Transportation Department. Report is based on information provided by law enforcement agencies on collisions resulting in injury, death, or damage to one person's property in excess of \$750.

School Bus Collisions

The Problem

- The number of school bus collisions decreased in 1997 while the number of persons injured rose slightly to 36. The number of serious injuries jumped dramatically in 1997. Of the 21 serious injuries, 16 were the result of one collision where the school bus overturned.
- Many local law enforcement agencies and Idaho State Police districts participate in public awareness campaigns each spring to alert motorists to the dangers of passing school buses while stop arms are extended and children are entering or leaving the bus.
- In 1997, the economic costs resulting from school bus collisions in Idaho were \$3,899,000. This represents 0.3% of the total cost of collisions.
- Most school bus injuries occur when the child is entering or exiting the bus.

School Bus Collisions in Idaho, 1995 - 1997

	1995	1996	1997	% Change 1995-1997
Total School Bus Collisions	68	97	78	+14.7
Fatalities	0	0	1	+100.0
Serious Injuries	0	1	21	+2,100.0
Visible Injuries	12	3	4	-66.7
Possible Injuries	36	30	11	-69.4

Prepared by: Office of Highway Safety, Idaho Transportation Department. Report is based on information provided by law enforcement agencies on collisions resulting in injury, death, or damage to one person's property in excess of \$750.

Sample

INTERESTED IN FEDERAL HIGHWAY SAFETY GRANT MONEY?

Request for Proposal -- Highway Safety Grants **Federal Fiscal Year 2000**

Last Year's
Lots

Each year, the Office of Highway Safety (OHS) awards grants to state and local governmental units to help solve Idaho's most critical traffic safety problems. Projects are considered for funding if they address highway safety problems in one or more of these focus areas:

Impaired Drivers	Risky Driver Behavior	Bicycle and Pedestrian Safety	Emergency Medical Services
Safety Restraint Use	Youthful Drivers	Roadway Safety/Traffic Records	Motorcycle Safety

The highway safety grant year begins in October and runs through the following September. This *Request for Proposal* is for projects that will begin in October 1999. The grants can support state planning to identify and quantify highway safety problems, provide startup or "seed" money for new programs, or provide new direction to existing safety programs. Grant moneys may also be used for one-time acquisition of technology, system upgrades, and/or equipment purchases that will be used to solve highway safety problems where a demonstrated need exists.

Depending on the type of project, funding may be considered for one, two, or at a maximum of three years. Successful projects in their second or third year normally receive priority. Consideration is then given to new applicants that **show the greatest potential for collision or injury reduction or system improvement.**

Highway safety projects often require the grantee agency to provide a portion of the funding for the project, called matching funds. In first year projects, grant money will generally reimburse 75 percent of the total project costs, in the second year 50 percent, and in the third year 25 percent. Matching funds can be in the form of cash or resources that support the proposed project. Highway safety programs are "seed money" programs, and agencies are generally expected to assume the full cost of programs and provide program continuation at the conclusion of the grant funding. **Agencies pay 100 percent of the project costs up-front as accrued, then request reimbursement from the Office of Highway Safety in the amount of the approved federal share.** Claims for reimbursement are usually submitted monthly or quarterly.

DESCRIPTIONS OF THE FOCUS AREAS AND EXAMPLES OF PROJECTS THAT HAVE BEEN FUNDED FOLLOW:

Impaired Drivers: The goal of this program area is to remove alcohol and other drug-impaired drivers from the roads. Some projects could include enforcement combined with public information outreach activities. We encourage jurisdictions working on these projects to work closely with their local media and "advertise" their enforcement activities and inform their community about highway safety. This program area can also fund DUI arrest system equipment, training for judges and prosecutors, and education programs like alcohol server training, designated driver awareness, and underage consumption outreach. The OHS is searching for creative programs that could reduce impaired driving in your community.

Safety Restraint Use: The overall goal of the Safety Restraint Program Area is to reduce deaths and serious injuries from motor vehicle crashes by increasing the proper use of safety belts and child safety seats. Projects include community public awareness activities, community education, and projects that involve enforcement of the seat belt and child restraint laws. Projects can include adult, teen, and/or child safety restraint use as a program emphasis, as well as funding to start or improve a local child safety seat distribution program.

Risky Driver Behavior: The goal of this program area is to reduce the incidence of risky driver behaviors, such as speeding, failure to yield, following too close, or disregarding sign or signal. The goal is accomplished by enforcing and encouraging compliance with traffic laws through the development and implementation of Selective Traffic Enforcement Programs, Accident Reduction Teams, Safe Community Programs, model programs to address risky driver behavior, and other similar projects which combine effective law enforcement and public awareness activities.

Roadway Safety/Traffic Records: The goal of this program area is to improve the safety of the roadway and environment, with special emphasis on the support of records systems that aid in identifying existing and emerging traffic safety problems and evaluating program performance. Roadway projects might include funds to **develop and implement systems and procedures** for carrying out safety construction and operation improvements; **develop guidelines and methods** of highway design, construction, and maintenance related to safety issues; upgrade skills of highway personnel; and develop plans for conducting traffic engineering services. Traffic records projects might include enhancements to the accident analysis capability of Crash Analysis and Reporting System (CARS), enhancements in accident data collection, or improvements to traffic safety data systems.

Youthful Drivers: The goal of this program area is to reduce the number of injury and fatal collisions among 15-19 year old drivers. Emphasis is on education, prevention, and enforcement activities directed toward this age group. Agencies are encouraged to work with local teen populations—including youth who are working community service for impaired driving offenses, youth SADD chapters, and other student organizations dedicated to safety—to create a comprehensive program where teens change the driving behavior of others teens. The OHS urges agencies to think creatively and work closely with the Office of Highway Safety when developing a youth program.

Bicycle and Pedestrian Safety: The overall goal of this program is to reduce roadway fatalities and serious injuries by reducing bicycle and pedestrian collisions through education, training local safety administrators, equipment, and providing direction and support for local communities. Emphasis is on public awareness campaigns that target school-age children, teens through adult, or a statewide campaign designed to reach all age groups.

Emergency Medical Services: The goal of this program area is to enhance appropriate and timely response and treatment for persons injured in highway crashes. The funding priorities for this area are the purchase of hydraulic extrication equipment and communication equipment.

Highway safety funds, by law, cannot be used for highway construction, maintenance or design. Requests for grant funds are not appropriate for projects such as safety barriers, turning lanes, stop lights, and striping roadways or crosswalks. Because of limited funding, the OHS does not fund the purchase of vehicles.

ELIGIBILITY REQUIREMENTS

1. Grant awards can only be made to local and state governmental entities within Idaho.
2. Agencies that receive highway safety funds must have a safety restraint use policy in place prior to the start of grant funding.
3. Law enforcement agencies must demonstrate that they are enforcing the safety restraint laws.
4. There must be a demonstrable highway safety collision, fatality, serious injury and/or systems problem.

HOW TO APPLY

Interested agencies must complete the attached Highway Safety Letter of Intent document and have it postmarked no later than February 26, 1999. Proposals should be mailed or faxed to:

Idaho Transportation Department
Office of Highway Safety
PO Box 7129
Boise, Idaho 83707-1129
Fax: (208) 334-4430

If you have any questions, please contact the Office of Highway Safety at (208) 334-8100.

Requirements

In accordance with 23 CFR 450.220, the Idaho Transportation Department hereby certifies that its statewide transportation planning process is addressing major issues facing the state and its non-urbanized areas, and is being carried out in accordance with the following requirements:

- 49 U.S.C. Section 5323(k), 23 U.S.C. 135, and 23 CFR part 450.220;
- Title VI of the Civil Rights Act of 1964 and the Title VI Assurance executed by each state under 23 U.S.C. 324 and 29 U.S.C. 794;
- Section 1101 of the Transportation Equity Act for the 21st Century (Pub. L. 105-178) regarding the involvement of disadvantaged business enterprises in the FHWA and the FTA funded project (Sec. 105 (f), Pub. L. 97-424, 96 Stat. 2100, 49 CFR part 23);
- The provisions of the Americans with Disabilities Act of 1990 (Pub. L. 101-336, 104 Stat. 327, as amended) and the U.S. DOT implementing regulation;
- The provision of 49 CFR 20 regarding restrictions on influencing certain activities; and
- (for states with non-attainment and/or maintenance areas outside metropolitan planning area boundaries) Sections 174 and 176 (c) and (d) of the Clean Air Act as amended (42 U.S.C. 7504, 7506 (c) and (d)).

Further, the Idaho Transportation Department concurs with the self-certifications of the Community Planning Association of SW Idaho, Bannock Planning Organization, and Bonneville Metropolitan Planning Organization regarding the development of Metropolitan Transportation Improvement Programs.

Other Requirements

As required by 23 CFR 450.212, the STIP was developed with **public involvement** under the process adopted by the Idaho Transportation Board on March 9, 1995.

Projects contained in the STIP are consistent with the *Idaho Transportation Plan*, as published by the Idaho Transportation Department in May 1995.

For all **air quality** nonattainment and maintenance areas in Idaho, the STIP conforms to all applicable criteria and procedures in 40 CFR Parts 51 and 93. These criteria and procedures have been satisfied during the TIP and STIP development and review processes. The STIP complies with all applicable conformity requirements, including those relevant to specific pollutants and implementation plan status.

The Idaho Transportation Department, as the Governor's designee, approved the metropolitan transportation improvement programs (MTIPs) for the Community Planning Association of SW Idaho, Bannock Planning Organization, and Bonneville Metropolitan Planning Organization in September 1999. All MTIP federal-aid projects are included in the STIP without modification.

All MTIP projects in the three years of the STIP are selected by agreement with the metropolitan planning organizations as provided for under 23 CFR 450.222. This means that projects in the second or third year could be moved to the first year without amendment. Any projects shown beyond the first three years are for information only.

STIP Development & Amendment Process

Statewide Transportation Improvement Program

The Statewide Transportation Improvement Program (STIP) must be based on a transportation planning process. The transportation planning process establishes policy and addresses the overall direction in the allocation of resources and coordination of the different modes of transportation. It classifies the various systems according to their function and assesses the performance and condition of the different modes and makes recommendations for improvements. It reviews the relationship of transportation to land use, economic development, the environment, and energy use. The process allows for public involvement in transportation planning for coordination with local governments and other agencies and for transportation funding and management of the department.

System plans are developed for individual modes of transportation. Through these plans, systemwide as well as specific facility needs are assessed along with prioritizing resources.

STIP Development

The STIP is a priority list of projects/programs to be carried out during the next three years (FY 2000-2002) by the Idaho Transportation Department. Also included are projects developed by each of Idaho's three metropolitan planning organizations (MPOs) located in Boise, Idaho Falls, and Pocatello.

As required by 23 and 49, *Code of Federal Regulations* (CFR), regarding the Statewide Planning; Metropolitan Planning; Rules, the state shall develop a STIP. The STIP shall include:

- A list of priority transportation projects proposed to be carried out in the first three years of the STIP. This list must be in conformance with each MPO's Metropolitan Transportation Improvement Program (MTIP);

- Cover a period of not less than three years, but at state discretion cover a longer period. Projects beyond three years are for information purposes only and are not subject to or submitted for approval by the Federal Highway Administration (FHWA) or Federal Transit Administration (FTA);
- Contain only projects consistent with the policies stated in the department's 20-year *Idaho Transportation Plan*;
- In air quality nonattainment and maintenance areas, contain only transportation projects found to conform, or from programs that conform to air quality standards in the Clean Air Act;
- Be financially constrained by year and include sufficient financial information to demonstrate which projects are to be implemented using current revenues and which projects are to be implemented using proposed revenue sources while the system as a whole is being adequately operated and maintained;
- Contain all capital and noncapital transportation projects (including transportation enhancements, Federal Lands Highways projects, trails, pedestrian walkways, and bicycle transportation facilities), or identified phases of transportation projects;
- Contain all regionally-significant transportation projects requiring an action by FHWA or FTA;
- Include for each project sufficient descriptive material; estimated total cost; amount of federal funds proposed to be obligated during each program year; for the first year, the proposed category of federal funds and source(s) of nonfederal funds; for the second and third years, the likely category or possible categories of federal funds and source(s) of nonfederal funds; and identified agencies responsible for carrying out the project; and
- For nonmetropolitan areas, include only those projects which have been selected in accordance with the project selection requirements.

Funding

Funds made available under 23 and 49 U.S.C. require the department to certify the STIP was developed in accordance with all applicable requirements of the Federal Transit Act, Title VI of the Civil Rights Act, sections related to disadvantaged business enterprises in FHWA- and FTA-funded projects, provisions of the American with Disabilities Act, and sections of the Clean Air Act. In addition, we must certify the program was developed with public involvement and is consistent with the Metropolitan Transportation Improvement Programs.

Amendment Procedures

Requirements

- The STIP is a three-year document. Any addition or deletion of a project to the STIP requires an amendment.
- A change in project funding source across modes for projects within the existing STIP requires an amendment; e.g., the funding for a project changes from transit to highway or vice versa.
- A change in funding priority within the existing STIP among highway funded projects only or among transit funded projects only **does not** require an amendment.
- Shifting existing projects within the STIP (first three years) will not require new public involvement since initial public involvement for the STIP covered the entire STIP time frame.

Approvals

Nonattainment areas:

- Amendments that involve projects which are air quality neutral as defined in the DOT/EPA Interim Conformity Guidance can be individually approved by the appropriate modal agency.
- Amendments that involve projects that are not air quality neutral require joint FTA/FHWA approval.

Attainment areas:

- Amendments that deal only with highway project actions or transit project actions and which are not of an intermodal nature can be individually approved by the appropriate modal agency.
- Amendments that deal with funding across modes, or that involve projects of an intermodal nature or interest (including but not limited to, HOV facilities, park-and-ride lots, or car pools) require joint FTA/FHWA approval.

Copies of all approved amendments must be provided to the other agency for information and to ensure that each agency is maintaining the same up-to-date STIP document.

Public Involvement

- The addition or deletion of projects from the STIP will require public involvement only in the region affected by the project.
- “Minor” projects (e.g. projects that do not affect air quality or require an environmental document) that were previously listed in the STIP but are programmed beyond the first three years will not warrant further public involvement by shifting such projects into the first three years.
- “Major” projects (e.g. projects that would require an environmental document or are regionally significant in terms of air-quality impact) that were previously listed in the STIP but are programmed beyond the first three years will require further public involvement before they can be shifted into the first three years.

The department has completed public involvement and considered public comments for the currently shown program.

Project Selection

The STIP is a three-year program with projects prioritized by year. This allows flexibility for the projects to move within the three-year time frame. The selection process may be concurrent with the project shift to the first year or may be a subsequent action. Any change in funding priority will require documentation that the state, MPO, or local agency responsible for project selection involved in the proposed changes has agreed to the proposed changes in funding priority. Projects originally in the first year must be implemented in the next year or accounted for in subsequent STIPs.
